

# Mount Carmel Inpatient Rehabilitation Center

## FY2009 Outcomes Report

In FY 2009, the Mount Carmel Inpatient Rehabilitation Center served 496 patients in their quest to live as independently as possible after sustaining serious injuries or illness. Those patients ranged in age from 20 to 93 years (average age of 65.9 years), 49% of whom were male and 52% female.

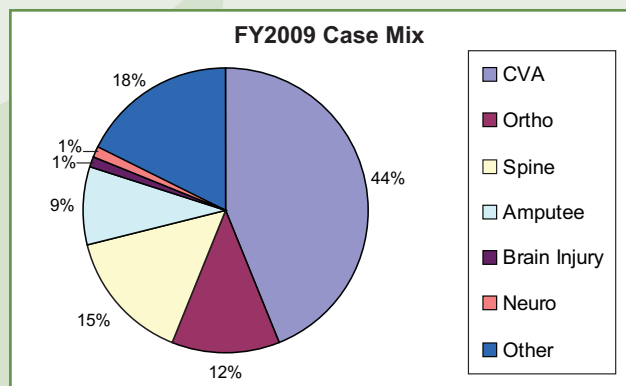

### Functional Outcomes

The graph below compares our patients' functional independence measurement (FIM) at the time of discharge with those of the region and nation.

### Case Mix

The FY2009 case mix represents the percentage of patients admitted by diagnostic category. The case mix is outlined in the chart below.

## FY2009 Outcomes Report

### Success Rate

Our patients had an average overall length of stay of 13.9 days, during which they received an average of three hours of therapy per day in a combination of occupational, physical and/or speech therapy. Additional services included recreational therapy, nursing education, case management and almost daily medical management.

There are a number of ways to measure rehabilitation success, but achieving predicted outcomes is among the best. 70% of Mount Carmel patients did so, and only 10% required an unplanned transfer to acute care (the regional average is 11%). Additionally, 69% of our patients were able to return home after their stay. The graph below shows our discharge rate by diagnostic category.

Following discharge, patient satisfaction surveys were sent to our patients for feedback on their stay. Our results were as follows:

- 100% said they would recommend our program to family and friends

We are also pleased to report that the Mount Carmel Inpatient Rehabilitation Center was successfully re-accredited by the Commission on Accreditation of Rehabilitation Facilities (CARF) as a Comprehensive Inpatient and Stroke Specialty Program and look forward to re-accreditation in 2010.

Admission to the center requires a referral from a licensed professional.  
For more information or to make a referral, call 614-234-1362.
